Net4Society - International network of National Contact Points (NCPs) for the Societal Challenge 6 in Horizon 2020

Net4Society is the international network of National Contact Points for the Societal Challenge 6 ("Europe in a changing world: inclusive, innovative and reflective societies") in Horizon 2020. National Contact Points (NCPs) are set up to guide researchers in their quest for securing EU funding.

This website is aimed at researchers and stakeholders interested in Horizon 2020's Societal Challenge 6 "Europe in a changing world". It is particularly relevant for researchers from the Socio-Economic Sciences and Humanities (SSH). The information on this website will help you find funding opportunities for your research project and provide you with up-to-date information on the European Commission's funding schemes.

Partner Search - Partner Offer

Nanotechnologies, Advanced Materials, Biotechnology and Advanced Manufacturing and Processing in HORIZON 2020

The NMP TeAm Partner Search Facility has been established by the network on NMP NCPs in order to offer best support to its clients. This web service is strictly focused on the open calls for proposals of the key enabling technologies **Nanotechnologies, Advanced Materials, Biotechnology and Advanced Manufacturing and Processing of HORIZON 2020**, related actions like FET open, ERA-NETS like SIINN and M-ERA.NET and inducement prize (Horizon Prize on materials for clean air). **The Partner Search Facility is open now for the NMBP-related call topics within the Horizon 2020 Work Programme 2016/2017.**

On this web-service we discern between

- **Partner Offer** - Researchers who offer their research expertise and who seek for collaboration in possible project consortia and
- **Partner Search** - Researchers or consortia with a definite idea for a project who are looking for further partners to complement the expertise scope of the consortium

In order to get information on the already published entries, please enter: [Search for partner entries](#)

Recommended Data Repositories

Scientific Data mandates the release of datasets accompanying our Data Descriptors, but we do not ourselves host data. Instead, we ask authors to submit datasets to an appropriate public data repository. Data should be submitted to discipline-specific, community-recognized repositories where possible, or to [generalist repositories](#) if no suitable community resource is available.

Repositories included on this page have been evaluated to ensure that they meet our requirements for data access, preservation and stability. Please be aware, however, that some repositories on this page may only accept data from those funded by specific sources, or may charge for hosting data. Please ensure you are aware of any deposition policies for your chosen repository. If your repository of choice is not listed please see our [guidelines for suggesting additional repositories](#).

Authors must deposit their data to a recommended data repository as part of the manuscript submission process; manuscripts will not otherwise be sent for review. If data have not been deposited to a repository prior to manuscript submission, authors can upload their data to figshare or the Dryad Digital Repository during the submission process.
