# Pendik Municipality, İstanbul

- Foreign Affairs Department is specialized for preparation for EU projects and other local, regional, national funded projects since 2005 with 13 experts.
- As Pendik Municipality, we have 15 environmental engineers who have completed their masters degree and specialized in the fields of waste management, recycling and decomposition.
- The engineers work in cooperation with EU project experts during preparation and implementation of H2020 projects.
- Since Pendik is an area where the urban transformation is intense, it is suitable for recycling of excavation.
- As Pendik Municipality, we have 2 different decomposition facilities for solid wastes and packs.

## a. Recycling of raw materials from end-life products

## **b. Recycling of Raw Materials From Buildings**

- Since Pendik is an area where the urban transformation is intense, it is suitable for the application «**Recycling of Raw Materials From Buildings**».
