CUSTOMER
SOLUTIONS

Sample Projects

PEAKAPP PROJECT

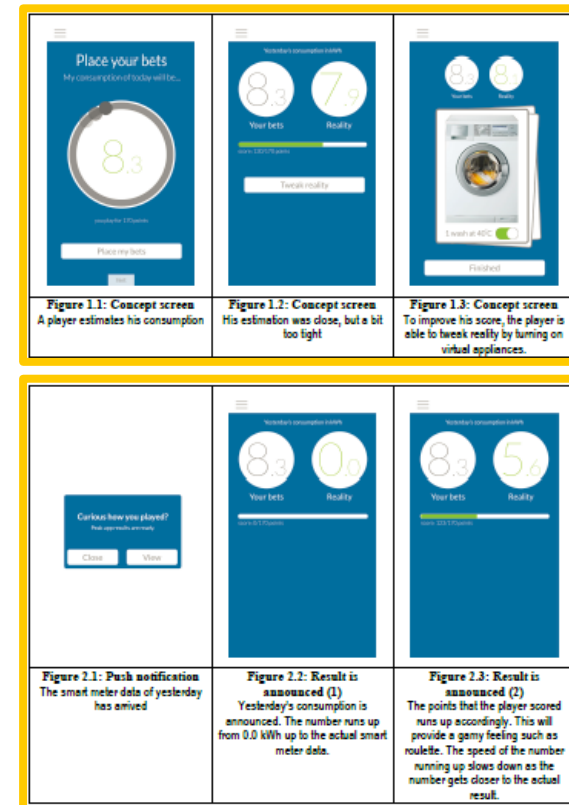

Project Objective

- The development of an unprecedented ICT-to-Human ecosystem
- To trigger lasting energy savings through behavioral change and continuous engagement,
- To enable increased consumption of clean and low-priced electricity from the spot market for household customers
- To connect them to social networks, to motivate them through serious gaming
- To boost the efficacy of Smart Home building energy management systems by integrating their functionalities into the PEAKapp solution

Incentive
HORIZON

Period
36 Months

Sample Projects

KRITA PROJECT

Project Objective

- Integration and interoperability of 'Smart City' components
- Development of digital services in order to establish information exchange between infrastructure operators and municipalities
- Determination of technical and regulatory rules for energy applications in 'Smart City' context

Incentive
EMRA

Period
32 Months

Sample Projects

SMART METER PROJECT

Project Objective

- Designing smart meter prototype by collaborating with local smart meter producer
- Expected properties of this smart meter are listed below
- Remote reading of consumption data
- Remote controlling of meters (on/off and limiting the load)
- Remote detecting of power cut and defects
- Developing meter to be compatible with national electricity grid
- Laboratory testing of prototypes

Incentive
EMRA

Period
33 Months

Sample Projects

DAGSIS PROJECT

Project Objective

- Planning and executing a business trip in order to make an assessment of best practices in the world regarding distributed generation, electric vehicles and storage systems
- Installation of PV system to a campus area in order to use the sample application to develop grid-integration principles
- Impact analyses of DG, HEPP, PV systems on power quality
- Optimization of localization of EV Fast chargers, DG points and storage systems
- Impact analysis and optimization of EV charger for several scenarios on distribution grid
- Study on peak shaving methods by using flexible loads, DG and storage

Incentive
EMRA

Period
5 Months

Work Programme 2018-2020 Focus

“Smart, Sustainable and Resilient Cities and Energy Efficient Buildings”

- LC-SC3-SCC-1-2018-2019-2020: Smart Cities and Communities (WS1)

“Smart Energy Systems and Consumers”

Smart and clean energy for consumers

- LC-SC3-EC-1-2018-2019-2020: The role of consumers in changing the market through informed decision and collective actions
- LC-SC3-EC-3-2020: Consumer engagement and demand response

Smart citizen-centred energy system

- LC-SC3-ES-1-2019: Flexibility and retail market options for the distribution grid
- LC-SC3-ES-3-2018-2020: Integrated local energy systems (Energy islands)
- LC-SC3-ES-5-2018-2020: TSO – DSO – Consumer: Large-scale demonstrations of innovative grid services through demand response, storage and small-scale (RES) generation
