# Pendik Municipality, İstanbul

- Foreign Affairs Department is specialized for preparation for EU projects and other local, regional, national funded projects since 2005 with 13 experts.
- As Pendik Municipality, we have 10 electrical engineers who have completed their masters degree and specialized in the fields of energy, renewable energy, energy efficiency.
- The engineers work in cooperation with EU project experts during preparation and implementation of H2020 projects.

# LC-SC3-SCC-1-2018-2019-2020: Smart Cities and Communities

## *Integrated Positive Energy Blocks*

- Positive Energy Blocks/Districts are designed to be integral part of the district/city energy system and have a positive impact on it.
  - Their design is intrinsically scalable and they are well embedded in the spatial, economic, technical, environmental and social context of the project site.
  - Since Pendik is an area where the urban transformation is intense, it is suitable for the application of large scale projects in the field of “positive energy blocks”.
- \*\*\* Pendik Municipality might be a part of the project as a Follower City.

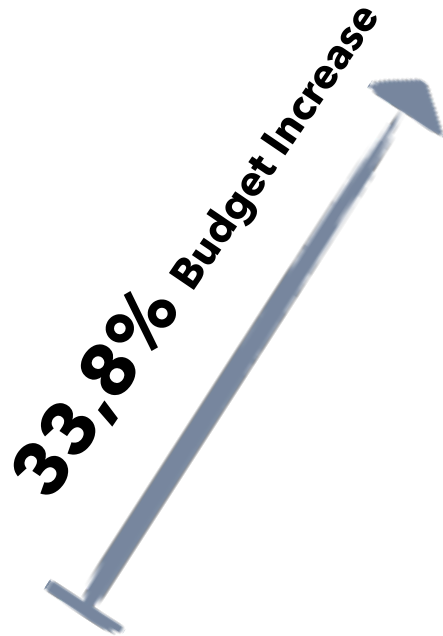

**Project Idea: Transformation of Municipal Buildings/Facilities into Energy Efficient Buildings**
