Description of the Organization

- **π – Technologies** is a spinoff company of Platon Ltd and it started aiming to the capitalization of the educational technology initially developed with-in Platon Ltd. In now days **π – Technologies** is working alongside major Educational Institutions in Greece (Aristotle University of Thessaloniki, Technological and Educational Institute of Central Macedonia and others) and is aiming to the following markets:
 - **Natural Based Solutions**
 - **Cultural Heritage**
 - **Research Management**

Description of the your research interest

- The key persons are highly trained professionals with academic degrees (MSc and PhD) and also professional managers and trainers. They all have long experience in the implementation of European Projects (more than 20 projects the last 4 years). They all have publications in peer reviewed journals, conferences (regional and international).

- Sustainable Rural Regeneration, is an innovative project on Rural Regeneration. The project's ambition is to set the framework for a Rural Regeneration Strategy that it will influence the way that investments are supporting the rural area, and the businesses, and the people and places within it.
- Rural areas with cultural Heritage have the potential for growth. The rural economies must increase the value of their economic output, and this can be achieved in part by attracting new businesses which operate in higher value sectors and markets, as the cultural heritage sector, but will also require existing companies (of low, medium and high output values) to increase their productivity by adding value to their output and exchanging lower value for higher value activity.
