Description of the Organization

- Our association was founded in 2009. Our starting point was to create an ecological society. We are interested in community supported farming practices, city gardening, ancestral seeds, beekeeping, climate change, coal power plants.
- Our EU project is called «Low Carbon Development Pathways in Turkey.» It is about low carbon pathways in priority sectors in Turkey and best practices from the legislations and implementations in the EU. Also cost and macroeconomic impacts associated with not meeting the 2° C degrees target.

Description of the your research interest

- We have 4 people for research. About our activities, we have around 100 members and more volunteers. We have been doing city gardening for 7 years. We organize city gardening classes, bee keeping in the city classes. We are trying to keep old ancestral seeds alive. We trying to help small scale farmers in order them to survive.

How to implement EU methods in Turkey for Renewable Energy

- We would like continue our EU low carbon development project. We'd like to prepare a guideline for Turkey about how to implement EU renewable energy methods to Turkey. We would like to continue our «Low Carbon Development» project.

Consortium - profile of known partners *(if any)*
