ICT-23-2017: Interfaces for Accessibility Specific Challenge (opening: 08 Dec. 2016, deadline: 25 Apr. 2017)

Objectives:

- Optimize the access to language-independent information
- Improve communication and facilitate use of digital services for persons with disabilities
- Deploy the most relevant solutions, independently of the used language and modality inputs

Tools:

- Smart personalised interfaces to deal appropriately with the diversity of users (focus, gender, ages, cognitive disabilities...)
- Crowdsourcing solutions to develop a multimodal interface
- Image-based tools to identify the end-user abilities and to detect its behaviours, emotions and intentions
- Combination of speech, language and video analysis technologies

Expected results: A user-driven multimedia-based Interface for persons with disabilities
