Ethical self assessment

- **Your first source should always be at your institution.** We would ask you to seek advice from colleagues with expertise in the ethics of research, such as:
 - specialised ethics departments
 - relevant managers in your university/research organisation
 - hospital research ethics committees
- Describe the ethical process in your organisation
- **Consider involving/appointing an ethics adviser/advisory board**
- **Consider that ethics issues arise in many areas of research.** Apart from the obvious example, the medical field, research protocols in social sciences, ethnography, psychology, environmental studies, security research, etc. may involve the voluntary participation of research subjects and the collection of data that might be considered as personal. You must protect your volunteers, yourself and your researcher colleagues.
