[Home](#) 

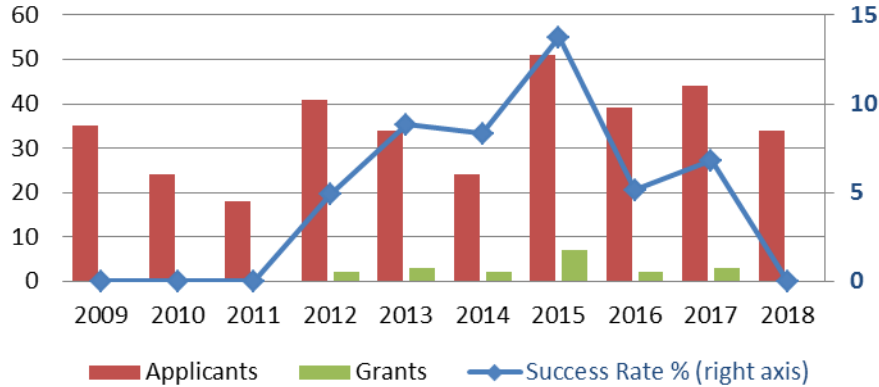

European Research Council (ERC) was established at 2007 during FP7 to fund European frontier research. The only criteria for ERC funding is scientific excellence and all decisions are made by scientists for scientists.

- ERC funds one Principal Investigator leading a team of researchers (no need for partners)
- ERC funds any field of research (Life Sciences, Physical Sciences and Engineering, Social Sciences and Humanities)
- ERC funds ground breaking, high risk-high gain projects that normally cannot be funded by national funding agencies
- The host institution, where the principal investigator will do his/her research, must be established in an EU Member State or Associated Country like Turkey
- The principal Investigator should spend a minimum of 50% of their total working time in an EU Member State or

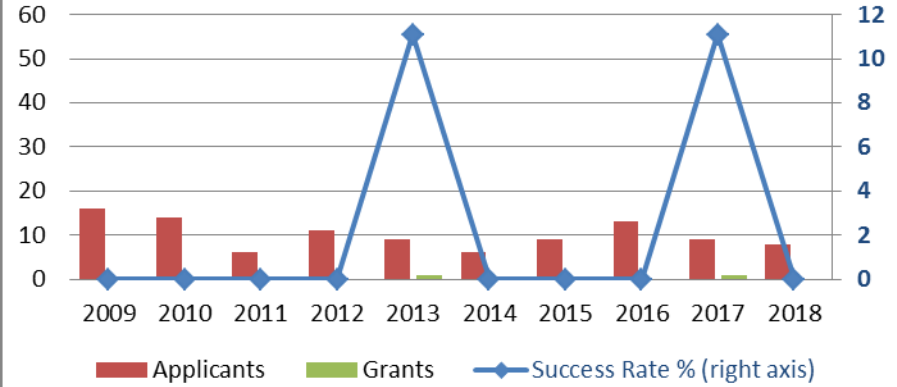

Turkey's performance in ERC

Starting & Consolidator Grant Applications from Turkey

Advanced Grants Applications from Turkey

StG&CoG Overall Success Rate in Europe: 16.1 %
StG&CoG Overall Success Rate in Turkey: 5.52 %

AdG Overall Success Rate in Europe: 7.1 %
AdG Overall Success Rate in Turkey: 1.98 %

Horizon 2020 StG&CoG Success Rate in Europe: 13.02%
Horizon 2020 StG&CoG Success Rate in Turkey: 7.3 %

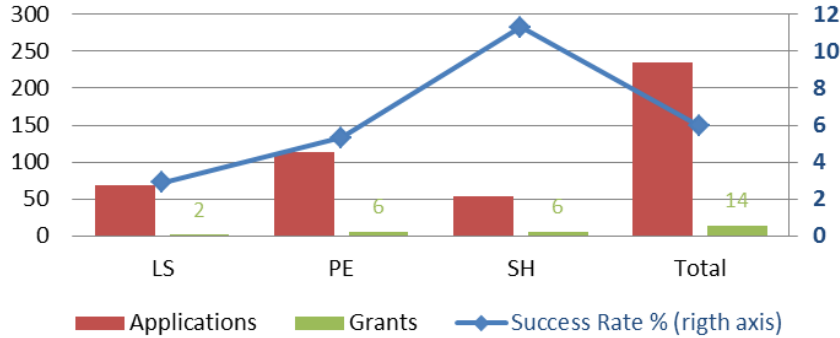

Horizon 2020 AdG Success Rate in Europe: 11.1 %
Horizon 2020 AdG Success Rate in Turkey: 2.2 %

*applicants at the time of the application

Turkey's performance in ERC: Domains

Applications from Turkey with respect to domains (2014-2018)

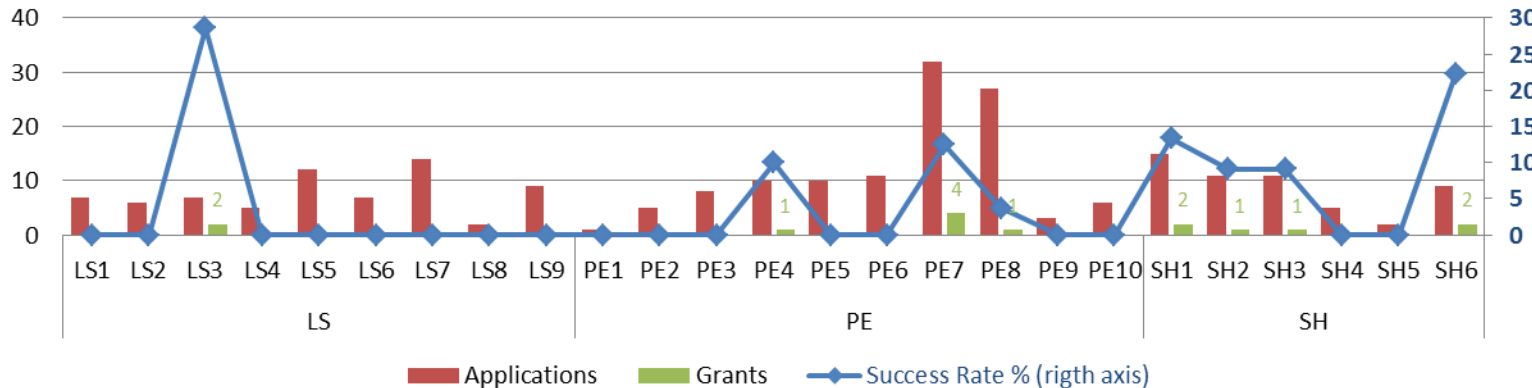

LS Overall Success Rate in Europe : 13.3 %
LS Overall Success Rate in Turkey: 2.9 %

PE Overall Success Rate in Europe: 12.61 %
PE Overall Success Rate in Turkey: 5.3 %

SH Overall Success Rate in Europe: 11.7 %
SH Overall Success Rate in Turkey: 11.3 %

Applications from Turkey with respect to panels (2014-2018)

ERC Evaluation

Common Weakness of Proposals from Turkey

442 evaluation summary reports from Turkey evaluated over two criteria

- Research Project Criteria
- Principle Investigator Criteria

Research Project Criteria

- The proposal is too narrow/too broad
- Insufficient/no project description (state of the art, objectives, methodology, scientific detail, approach)
- The proposal does not indicate the advantages of the proposed approach over other research that will be carried out by other groups
- The proposal is essentially an applied project which is unlikely to result in important scientific breakthroughs
- Incremental rather than ground-breaking

Research Project Criteria (continued)

- High gain but medium/risk
 - Not well supported by preliminary experimental data
 - The proposed work is a straightforward extension of the PI's current research activities
-
- Classical/conventional methodology
 - This kind of research could be support by the local resources
 - Missing strategy or vision for the implementation ethical issues
 - Too descriptive proposal

Principle Investigator Criteria

- The candidate has limited international experience/exposure/recognition/publication
- Low publication, low citation, low impact factor
- Little/no evidence of independent research (For StG and CoG)
- The potential for future leadership in this area of research is not high (For StG and CoG)

Teşekkürler
