**Making full and
immediate
Open Access a
reality**

<https://www.coalition-s.org>

About Plan S

Plan S is an initiative for Open Access publishing that was launched in September 2018. The plan is supported by cOAlition S, an international consortium of research funding and performing organisations. Plan S requires that, from 2021, scientific publications that result from research funded by public grants must be published in compliant Open Access journals or platforms.

The poster features a central image of a laptop keyboard with the word "Access" and an open padlock icon overlaid. The text "2021" is prominently displayed in a white box on the left side of the keyboard image. The entire graphic is set against a solid orange background.

Plan S

MAKING FULL & IMMEDIATE OPEN ACCESS A REALITY

2021

Access

www.coalition-s.org @cOAlitionS_OA

Ten principles

01 *copyright*

Authors or their institutions retain copyright to their publications. All publications must be published under an open license, preferably the Creative Commons Attribution license (CC BY), in order to fulfil the requirements defined by the Berlin Declaration.

service criteria

The Funders will develop robust criteria and requirements for the services that high-quality Open Access journals, Open Access platforms, and Open Access repositories must provide.

02

03 *incentives*

In cases where high-quality Open Access journals or platforms do not yet exist, the Funders will, in a coordinated way, provide incentives to establish and support them when appropriate; support will also be provided for Open Access infrastructures where necessary.

publication fees

Where applicable, Open Access publication fees are covered by the Funders or research institutions, not by individual researchers; it is acknowledged that all researchers should be able to publish their work Open Access.

04

05 *business models*

The Funders support the diversity of business models for Open Access journals and platforms. When OA publication fees are applied, they must be commensurate with the publication services delivered. The structure of such fees must be transparent to inform the market and funders potential standardisation and capping of payments of fees.

transparency

06 The Funders encourage governments, universities, research organisations, libraries, academies, and learned societies to align their strategies, policies, and practices, notably to ensure transparency.

application

The above principles shall apply to all types of scholarly publications, but it is understood that the timeline to achieve Open Access for monographs and book chapters will be longer and requires a separate and due process;

07

transformative arrangements

08 The Funders do not support the 'hybrid' model of publishing. However, as a transitional pathway towards full Open Access within a clearly defined timeframe, and only as part of transformative arrangements, Funders may contribute to financially supporting such arrangements;

monitoring

The Funders will monitor compliance and sanction non-compliant beneficiaries / grantees;

09

research assessment

10 The Funders commit that when assessing research outputs during funding decisions they will value the intrinsic merit of the work and not consider the publication channel, its impact factor (or other journal metrics), or the publisher.

Plan S

Making full & immediate
Open Access a reality

Examples of Principle #10 in Practice

Before

After

Responsible research assessment and evaluation

	Before	After
 Attitudes	Competition	Collaboration
 Journals	Reputed for prestige & publisher	Reputed for fast & fair reviews
 Research	Highly selective Flashy, newsworthy	Solidly reproducible Robust
 Evaluation	Only articles matter Quantitative metrics & Impact Factor Opaque	All outputs & contributions matter Qualitative metrics & intrinsic merit Transparent

Plan S & Rights Retention

#RetainYourRights

Shareyourpaper.org by Open Access Button

For Libraries

<https://shareyourpaper.org>

Make your research visible and see 30% more citations

We can help you make your paper Open Access, for free, wherever you publish. It's legal and takes just minutes. Join millions of researchers sharing their papers freely with colleagues and the public.

Start by entering the DOI of your paper

We'll gather information about your paper and find the easiest way to share it.

Next

Try an example [10.1126/scitranslmed.abc2344](#) or [learn more](#).

You can freely share your paper!

We have checked and the journal encourages you to freely share [your paper](#) so colleagues and the public can freely read and cite it. [1]

✓ Find the manuscript the journal accepted. It's not a PDF from the journal site

This is the only version you're able to share under copyright. The accepted manuscript is the word file or Latex export you sent the publisher after peer-review and before formatting (publisher proofs).

✓ Check there aren't publisher logos or formatting

It's normal to share accepted manuscripts as the research is the same. It's fine to save your file as a pdf, make small edits to formatting, fix typos, remove comments, and arrange figures.

✓ Tell us your email

We'll only use this if something goes wrong.

We'll check it's legal, then promote, and preserve your work

By depositing you're agreeing to the terms [1] and to license your work under the publisher's terms [1].
