HORIZON 2020
COOPERATION. INNOVATION. COMPETITIVENESS

Technical Assistance for Turkey in Horizon 2020 Phase-II
EuropeAid/139098/IH/SER/TR

Turkey in Horizon 2020 II

Our Experience in H2020

Dr. Tolga Sönmez, HAVELSAN

General & Introductory Training on Civil Security
for Society

26th May 2021

REPUBLIC OF TURKEY
MINISTRY OF INDUSTRY
AND TECHNOLOGY

Havelsan

- Large Industrial Company
- Headquarters in Ankara Turkey
- ~1800 employees, mostly engineers
- Four main fields of activity of HAVELSAN are:
 - Command and Control Systems,
 - Training and Simulation Technologies,
 - Country and Cyber Security Solutions, and
 - Management Information Systems.

Core Competencies

Signal processing

- Advanced signal processing applications
- Kalman filters, particle filters, estimation and optimization algorithms
- Modelling, hardware and software simulators

Navigation Systems

- INS/GPS systems
- Indoor localization
- Terrain Aided Navigation Systems
- Integration of MEMS inertial sensors
- Capturing human motion data, classification

Artificial Intelligence

- Deep Neural Networks, CNN, RNN
- AI algorithms applied on motion data, bio mechanics, anomaly detection
- Health applications using motion data

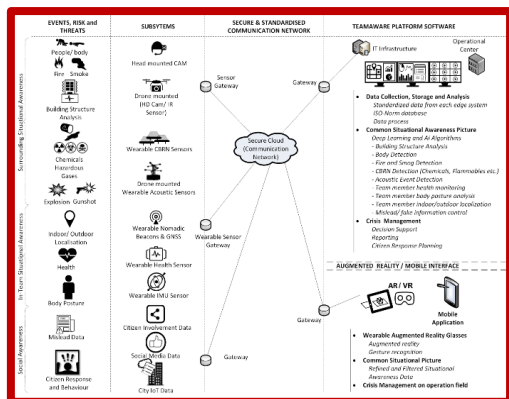

Sensor Fusion

- Multi sensor fusion
- Processing and fusion of radar, electro-optic, AIS, sonar sensors
- Tracking of targets in a single fused picture

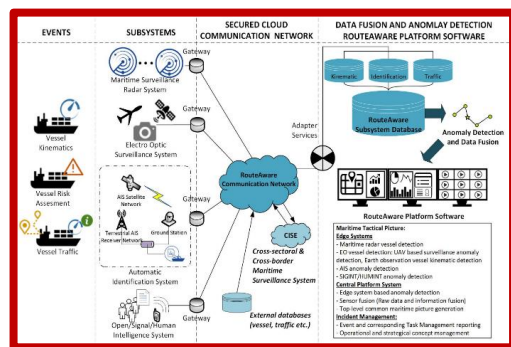

Horizon Experience

- Started with Evaluator experience
- Participation experience with few projects in 7th Framework,
 - Mismatched consortium
 - Out of focus project scope
 - Engineers' unbearable desire to mix and match everything
- In 2018, we have decided to coordinate Horizon projects.

EU Projects

2019 (13.0/15.0)
DRS-2020 (Ranked 1st among 92
15.0/15.0)

BM-2020 (11.50/15.0)

BLE based indoor navigation systems
ITEA project

SU-DRS02-2020: Technologies for first responders

- 1st rank among 92 projects with 15.0/15.0 points

TeamAware

Havelsan Responsibilities

- Project Coordination
- BMA (Body Motion Analysis), remote monitoring of activities by wearables, AR and AI algorithms for activity detection. Fatigue, wound detection.
- Mathematical model for dispersion of chemicals

Budget= 7M€

Duration: 36M

Wearable Technologies- Motion Capture

Edge Units

- 9 DOF (gyroscope, accelerometer, magnetometer)
- BLE data rate (20-25 Hz)
- Coverage: ~ 50m (outdoor), ~ 20m (indoor)
- Battery Life: 10 hr
- Dimensions: 69.5x50.5x21 [mm]
- Weight: 50 gr

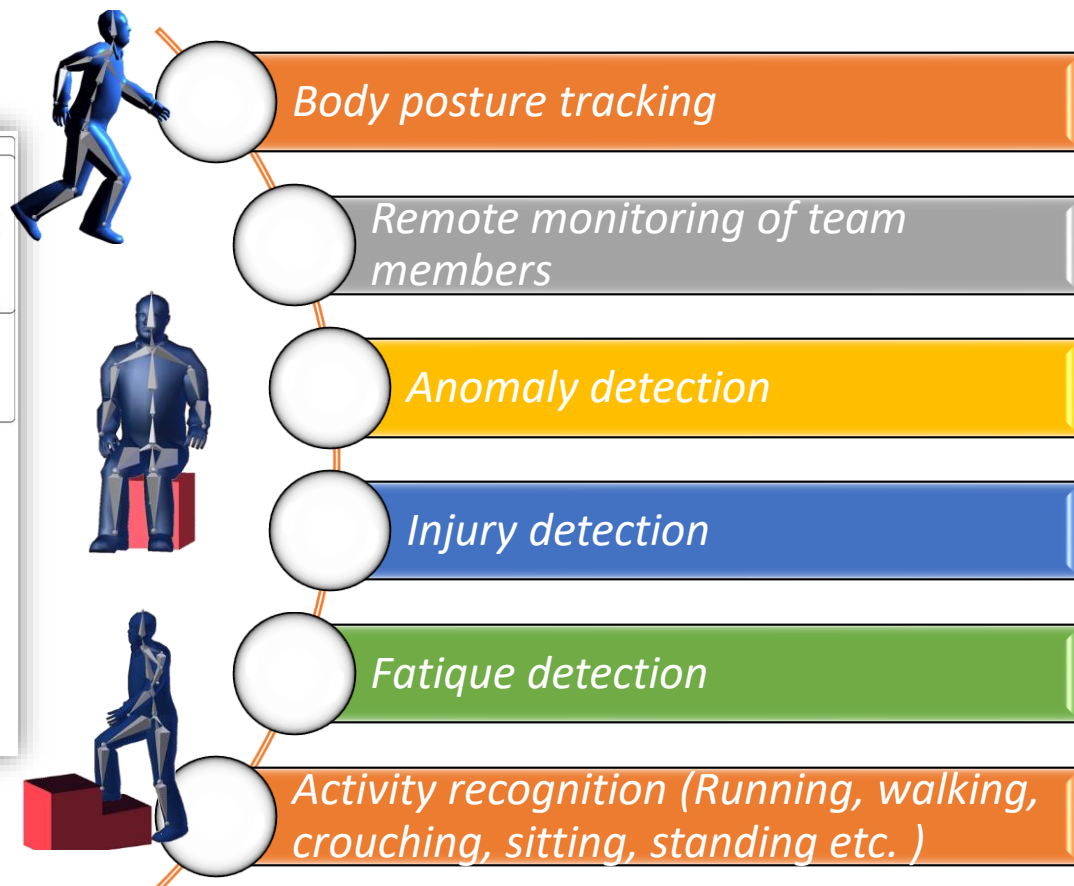

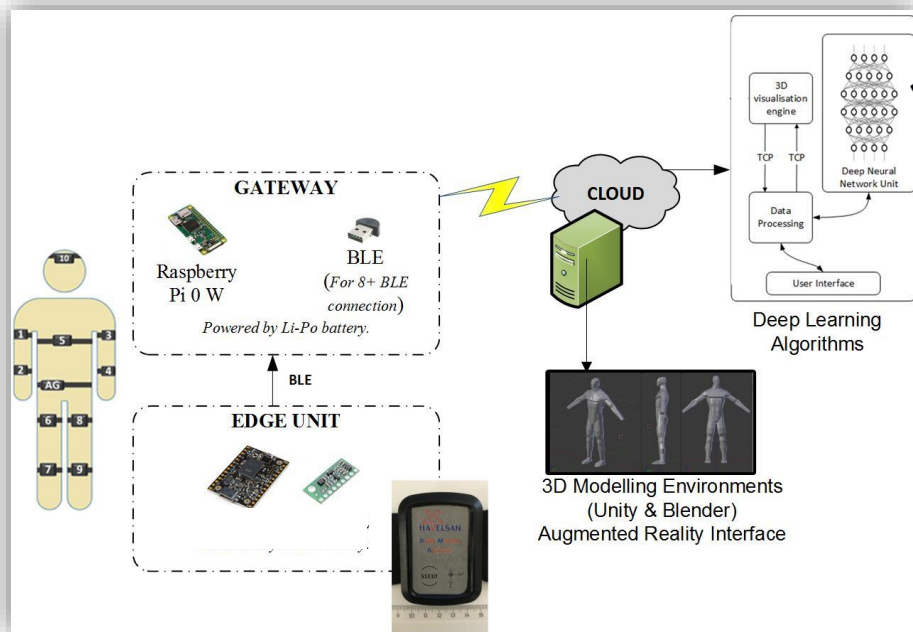

Gateway

- BLE – WiFi gateway
- TCP Protocol
- Bandwidth ~ 20 Kbps
- Latency: < 50 ms
- Battery Life: 10 hr

Central Unit and UI

- 3D Modelling
- Body motion modelling (High accuracy – error <1°)
- AI based body motion analysis
- AR/VR UI
- Customizable UI

Key Features

DEMO

Roadmap to Grand Agreement

Grants

Applying for funding

Evaluation & Grant signature

Grant management

- We analyse the calls and select the best fitting one and form a basic project idea
- To find partners, we use the brokerage events
 - Complementary consortium
- Then we start to collect the information from partners
 - Improve the project idea
 - State of art
 - Innovation potential
- We write a harmonized proposal.

Grant Preparation

- After the evaluations you have to sign a
 - Grant Agreement with EC
 - Consortium Agreement with the partners
- A project officer is assigned to your project after the evaluations
- You have to negotiate over the ethics and security scrutiny reports and resolve the conflicts update the proposal accordingly.

Ethics

Activity	Who?	When?	How?
Ethics Self-assessment	Applicant	Application phase	Consideration of ethical issues of the proposal
Ethics Pre-screening/Screening	Ethics experts and/or qualified staff	Evaluation phase	Review of application material
Ethics Assessment (for proposals involving hESC or raising serious ethical issues: severe intervention on humans)	Ethics experts	Evaluation/ Grant preparation phase	Review of application material
Ethics Check/Audit	Ethics experts	Implementation phase	Review of project deliverables/interview with applicants

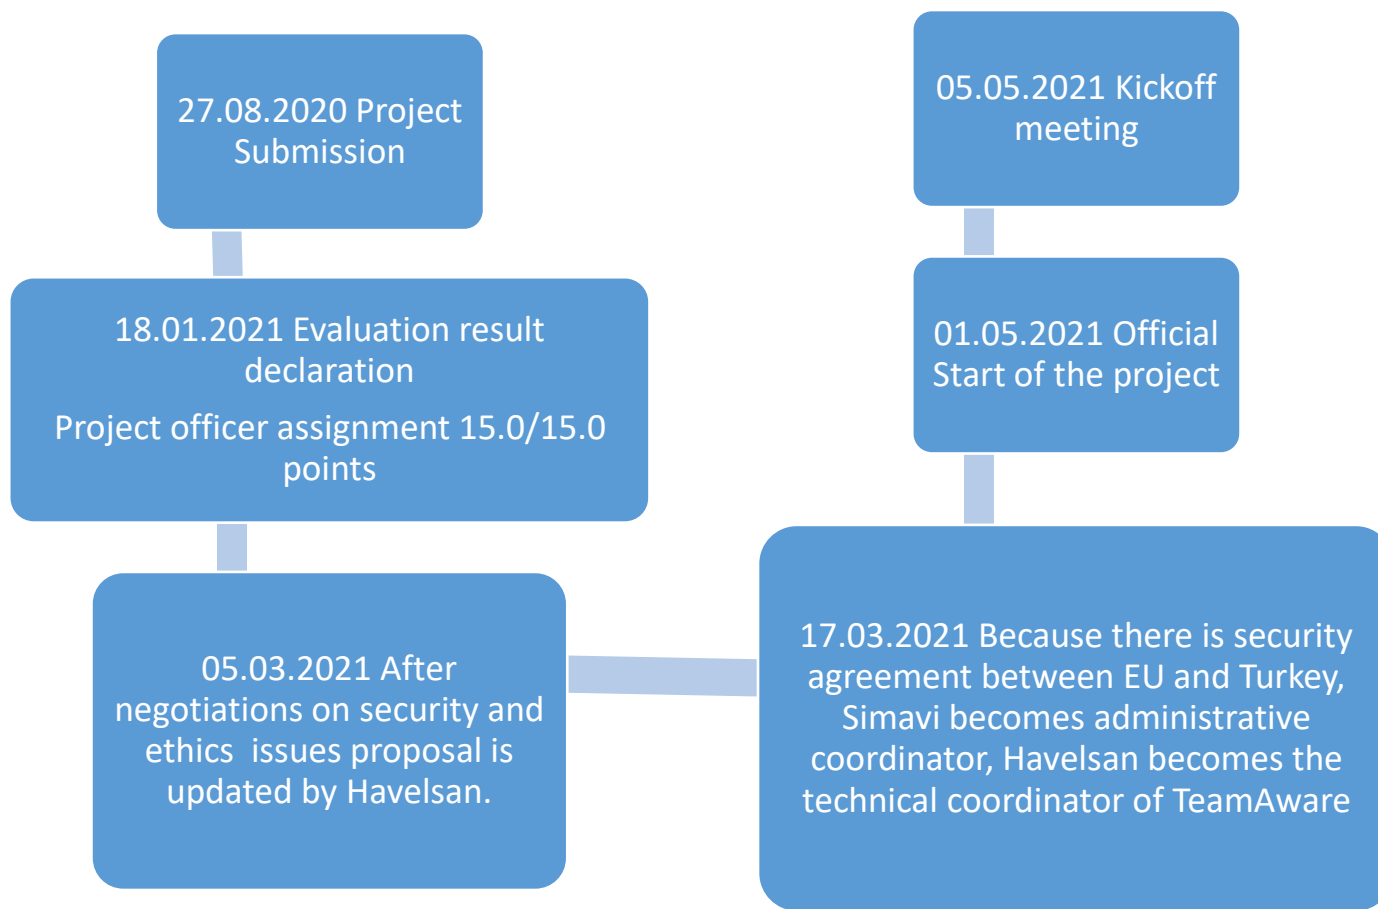

- GPDR issues, genetic research, dual use items (civil/military application), misuse of research
- Ethics summary report is drafted after the project is selected for funding.

Security

- There are four **levels of classification***:
 - TRÈS SECRET UE/EU TOP-SECRET (**TS-UE**)
 - SECRET UE/EU SECRET (**SEC-UE**)
 - CONFIDENTIEL UE/EU CONFIDENTIAL (**CON-UE**)
 - RESTREINT UE/EU RESTRICTED (**RES-UE**)
- The classification of information is decided in security scrutiny report after your project is selected for funding.
- Explosives, CBRN, critical infrastructure and utilities , border security , intelligent surveillance, terrorism, organised crime, digital security, space
- In our project 4 out of 166 deliverables are selected to be EU restricted.

*EU grants: H2020 Guidance — Guidelines for the classification of information in research projects: V2.2 – 07.01.2020

Timeline for TeamAware

After Kickoff

- Adventure just starts...
