Description of the Organization

The reference research centre in packaging, transport and logistics.

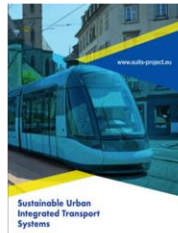

- RTO since 1994.
- Last 7 years: 30 funded European projects, of which 8 coordinations.

Description of your research interest

R&D lines

Transport & mobility

1. Low-emission transport / de-carbonization
2. Intelligent, autonomous and connected mobility
3. Sustainable urban logistics
4. Logistic chains 4.0
5. Circular economy / waste management

- Historical of 23 funded EC projects
- 6,17 M€ of return
- 7 ongoing projects: 2 as coordinator

Project Idea

HORIZON-CL5-2022-D6-02-04

Accelerating the deployment of new and shared mobility services for the next decade

- Objectives:
 - Congestion and air pollution reduction, reduced road risk, social inclusion, accessibility in each city (living lab).
 - Increased share of new and shared mobility services (NMS) in the modal distribution, e.g. by 25% compared to a realistic baseline and financial viability of services.
 - Integration of new and shared mobility services with public transport (e.g. filling service gaps and off-peak periods), in at least following three collaborative use cases/living lab that will facilitate data sharing and connectivity with remote/peri-urban areas.
 - Developing results based policies as well as recommendations/each project in line with the Sustainable Urban Mobility Planning guidelines, to increase the understanding and take-up of new mobility services by local/regional authorities and public and private mobility service providers.

This project is co-financed by the
European Union and the Republic of Turkey
Bu proje Avrupa Birliđi ve Türkiye Cumhuriyeti tarafından
finanse edilmektedir
