CROSS - CUTTING EXPERTISES

Dissemination, Communication & Exploitation

Network for Use Case Demonstration

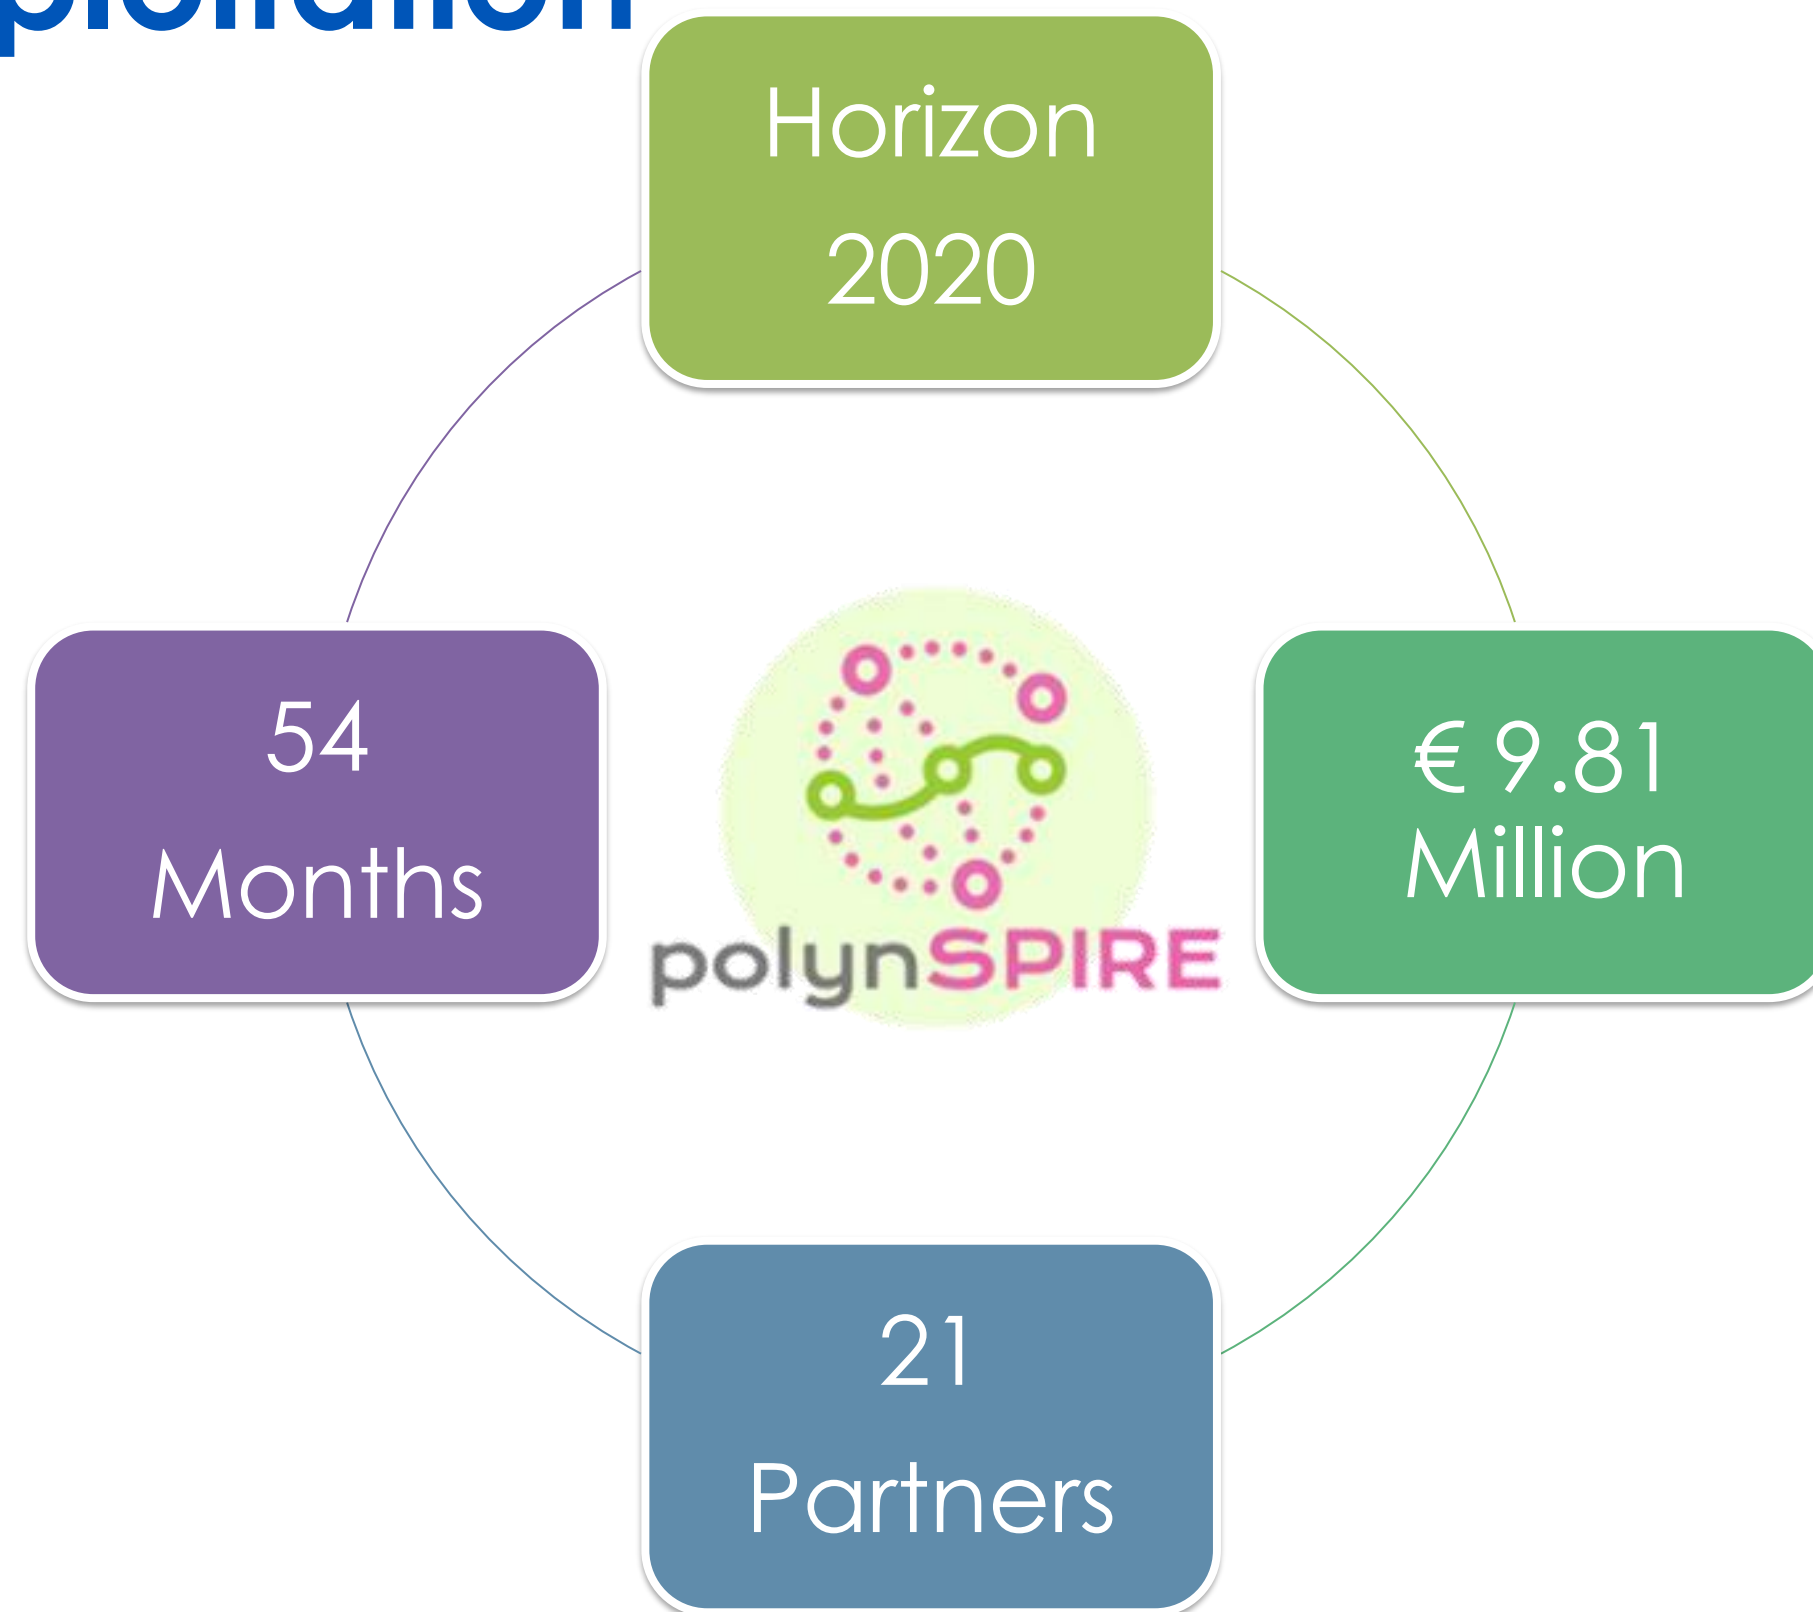

Communication, Dissemination & Exploitation

- It is a research project with the aim to demonstrate a set of **innovative, cost-effective** and **sustainable solutions**.
- It aims to improve the energy and resource efficiency of plastic recycling processes for post-consumer and post-industrial waste streams containing at least 80% of plastic materials.

Communication, Dissemination & Exploitation

Communication, Dissemination & Exploitation

- The Networking Event was organized by **IKMIB** and it provided an opportunity for project partners to meet companies that are working daily in competitive markets and listening needs of the end-user.

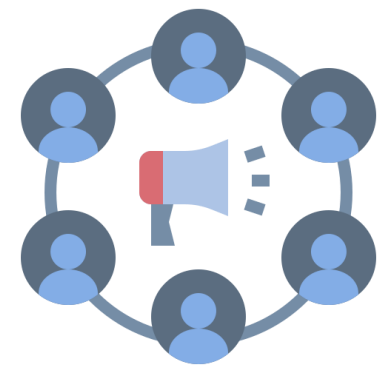

Communication, Dissemination & Exploitation

- ✓ This event included direct meetings between polynSPIRE consortium members and selected local Turkish companies.
- ✓ The companies have shown their interest in the exploration of collaborative solutions in the field of sustainable treatment of plastic materials.

MİB Yönetim Kurulu Üyesi Ahmet Faik Bitlis, İstanbul Maden ve Metaller İhracatçı Birlikleri (İMİMB) Genel Sekreteri Dr. S. Armağan Vurdu, polynSPIRE Proje Koordinatörü Tatiana Garcia Armingol de katıldı. KORDSA temsilcilerinin de yer aldığı toplantıda 2018 yılında 116 milyon dolarlık plastik atık ithalatı yapıldığını ifade eden Pelister, "Sektör ithal ettiği bu atığı geri dönüştürerek toplamda 770 milyon dolar düzeyinde bir ihracatçı vakalatı" bilgisini verdi

PIRE has been a great journey taken by a bus filled with
tanding and hardworking community of innovation enthusiasts.
dissemination responsible in Turkey, I was able to reach out our
rs and raise their awareness on the most important issues of the
y during which I found the opportunity to expand my network in
ational and international level.

Trust is key when managing an excellent consortium such as polynSPIRE,
leading not only innovations for more efficient degradation of polymers,
but their implementation of into the industrial sector as well.

- A comprehensive social media campaign was launched to present polynSPIRE partners and people working on the project.
- Interaction was created on social media accounts.
- The visuals of the campaign were prepared by IKMIB.

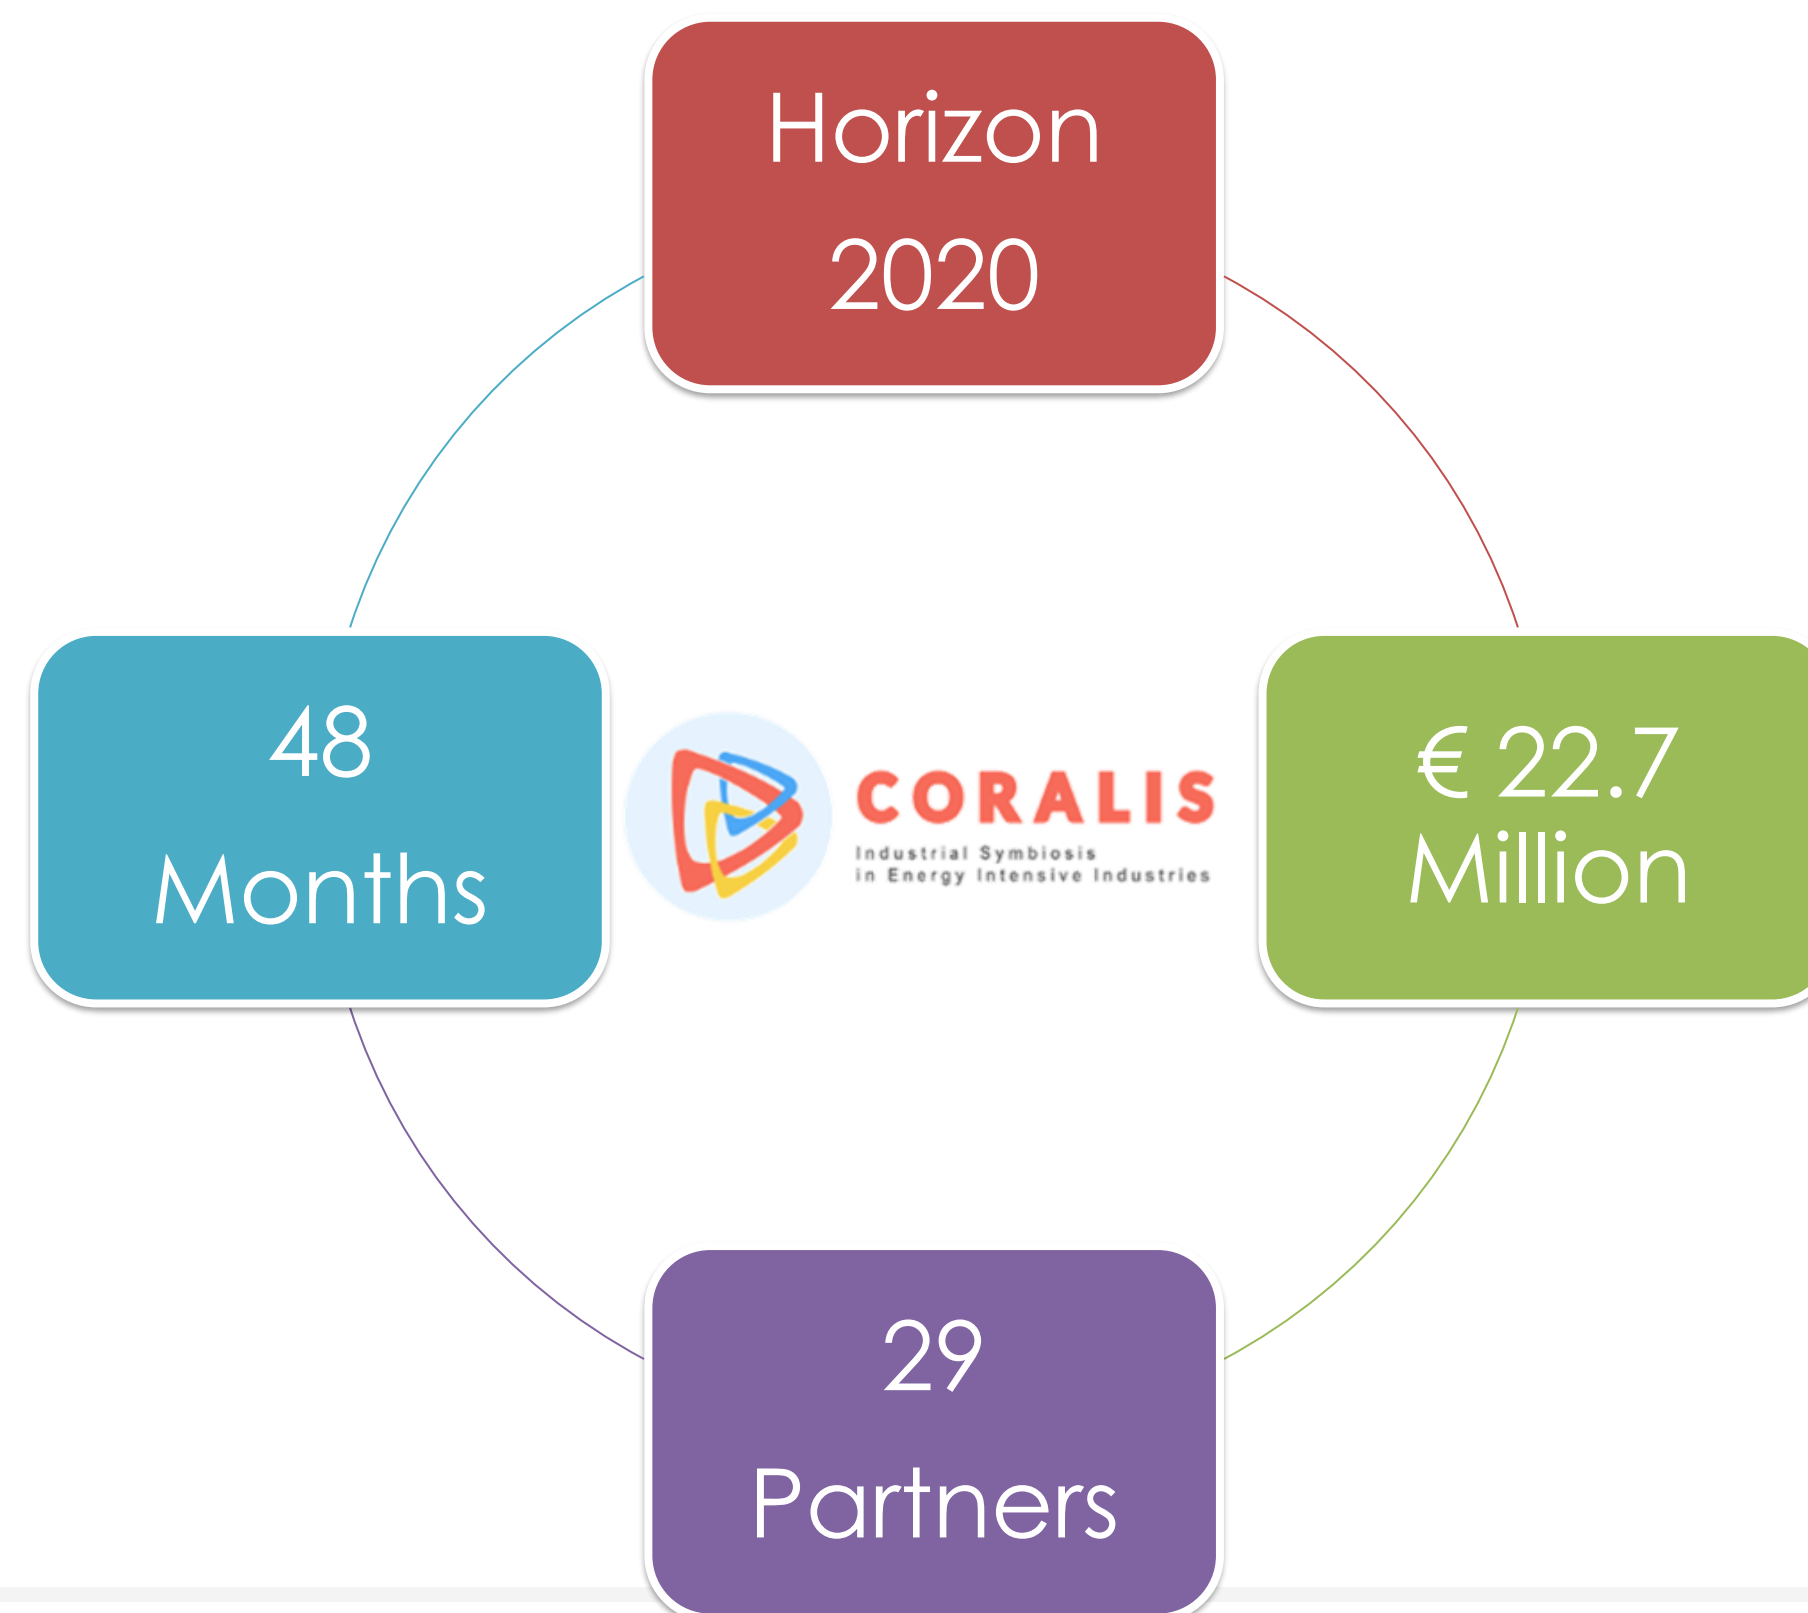

Communication, Dissemination & Exploitation

	The aim of the CORALIS Project is to disseminate industrial symbiosis solutions in energy-intensive sectors and to overcome barriers in this area.
	Thanks to industrial symbiosis, our industry will have the opportunity to reduce raw material and waste costs, to obtain additional income from non-recyclable wastes, and to prevent the accumulation of wastes by using them in different industries.
	The task of IMMIB is to collect information from the industrial area designated for symbiosis and to ensure that this information reaches to the work package leader.

Communication, Dissemination & Exploitation

Communication, Dissemination & Exploitation

- The industrial area working with İMMİB in our project is **TÜPRAŞ**.
- **Study Meetings** were held to investigate whether the materials produced by TÜPRAŞ as waste can be used as inputs for different industries.
- The information gathered will be fed back into the project, enabling a stronger knowledge community and more comprehensive compilation of industrial symbiosis options for all partners.

Communication, Dissemination & Exploitation

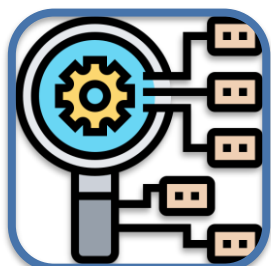

Within the scope of the CORALIS Project, a **Vision Workshop** was organized with the participation of institutions and organizations from various branches of the industry.

Determination of cooperation relations on Industrial Symbiosis in Turkey before and after **CORALIS** implementation.
Identifying the governance structure needs for Industrial Symbiosis in the region to manage these cooperative relationships

Determining common goals and creating a common vision for the industrial symbiosis structure in the region

Identifying potential new Industrial symbiosis initiatives

Communication, Dissemination & Exploitation

INNOCOACH Project aims to exchange of knowledge on **EIC Program Coaching** for SMEs through peer learning activities promoting the SMEs participation and support.

Communication, Dissemination & Exploitation

- ❑ **INNOCOAH Project** uses its smart platform” **Nir-vana**” which is the result of our previous project under **INNOSUP**.
- ❑ Examples of good practices will be shared among stakeholders and innovation agencies in regional & national level.
- ❑ This will enable consortium to have *long lasting communications and sustainable relations* for the years to come.

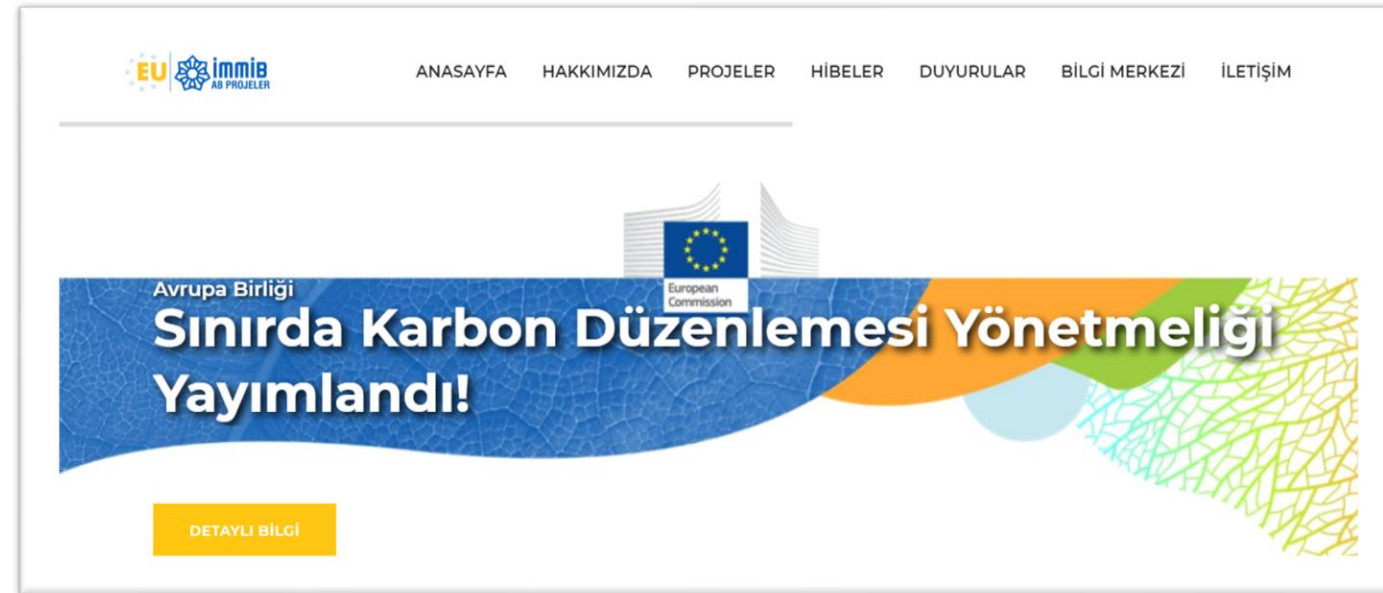

Communication, Dissemination & Exploitation

- ❑ INNOCOACH Project hosts the EIC Accelerator Online Workshop!
- ❑ Date & Time: **November 30th, 2021** / 11:30 AM - 3:00 PM (CET)

The European Green Deal - AB Yeşil Düzen

Atmosfer ısınıyor ve iklim her geçen yıl değişiyor. Gezegendeki sekiz milyon türden bir milyonu kaybolma riski altındadır. Ormanlar ve okyanuslar kirleniyor ve yok ediliyor. "Avrupa Yeşil Düzeni" bu zorluklara yanıt olarak 2050 yılında net sera gazı emisyonu bulunmayan ve ekonomik büyümenin kaynak kullanımından ayrıldığı modern, kaynak verimli ve rekabetçi bir ekonomiyle AB'yi adil ve müreffeh bir topluma dönüştürmeyi amaçlayan yeni bir büyüme stratejisidir.
