Description of the Organization

- The University of Tartu is the oldest and largest higher education institution in Estonia and has been the centre of Estonian academic life for almost four centuries. It is ranked in the top 1.2% of the world's universities making it one of the leading universities in Northern Europe. Here, 13 000 students and 3000 staff members study and work in a diverse range of fields connected by the power of curiosity.

Description of your research interest

Tartu Observatory of University of Tartu climate research team consists of 4 climate scientists. Our interests are:

- Climate model projections;
- Climate natural variability and extremes;
- Co-occurrence of climate risks.

Project Idea

Interested Call Topic: HORIZON-MISS-2021-CLIMA-02-01

Better understanding of climate change related risks

Objectives:

- to determine climate parameters extremes possible shift
 - to determine changes in regions vulnerability
-
- Expected results:
 - maps of climate parameters extremes during climate change
 - maps of regions vulnerability with changes due to climate change
